Claim Objections

1. In claim 1, "an input terminal" is defined twice.

Claim 8 should depend on claim 7.

In claim 10, "an input terminal" was previously defined in base claim 1.

In claim 11, it is not clear as to which input terminal "the input terminal" refers.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Kanouda et al. (USPN 6,489,756).

Fig. 1 discloses an output terminal at VD, at least one input terminal 51 (input to 52), and a regulator including output driver circuitry 2, a first control circuit 9, a second control circuit 10a and configuration circuitry 12a/52 as recited in claim 1.

Conclusion

4. Claims 2-14 are objected to as being dependent upon a rejected base claim, but may be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Claims 15-20 appear to be allowable over the Prior Art of record.
